

Reading through the information on the Sky Ocean Rescue Fact Sheet and answer the following questions:

1. What is one reason that oceans are important to us?
2. How much rubbish is dumped into the ocean every minute?
3. Name one of the worst types of plastic pollution affecting the ocean.
4. How deep under the ocean have plastics been found in the stomachs of sea creatures?
5. What is one way that Sky is trying to reduce the amount of single-use plastic reaching the ocean?
6. What is one way that supermarkets are reducing the amount of single-use plastic reaching the ocean?

## Thinking challenge

7. Who do you think should be most responsible for stopping single-use plastics reaching the ocean (e.g. people, stores and supermarkets, the government, plastic manufacturers)? Why?
